Photo #19 - Mr. Paul White discussing the merits of a hibiscus bloom with Prof. John V. Watkins. Prof. Watkins gave a very interesting slide illustrated lecture on the plants of the Caribbean. He was given an honorary membership in the AHS during the meeting. See story on page 6.

Photo #20 - Sophia and Walter Baum holding the beaded hibiscus arrangement she made. The arrangement was given away at the convention. The hibiscus flowers and leaves were made of small glass beads strung on wire. It must have taken hundreds of hours and many thousands of beads.
